

Task

Subject: Deschutes

Status: Not Started

Percent 0

Complete:

Total Work: 0

Actual Work: 0

Owner: Hodgkiss, Miranda

Technical questions:

- **Ex. 5 Deliberative Process (DP)**

 - We don't have turbidity data, but we have limited TSS data
 - Check in municipal SW work, USGS gages, graduate student paper, Derek Booth (summarized numerous sediment turbidity rating curves)
 - The waters aren't listed for turbidity
 - When we run existing sediment budget and/or RSULE, we will generate sediment in tons/yr.
 - Chance that LC for fine sediment could cause exceedance of turbidity criteria
- **Ex. 5 Deliberative Process (DP)**

 - Primary source of turbidity is non-volatile solids or mineral sediment
 - **Ex. 5 Deliberative Process (DP)**
- **Ex. 5 Deliberative Process (DP)**
- What does WA do for sediment TMDLs?
- When will Ecology be ready to share their Budd Inlet model outputs with us?
- Look at Clarks Creek TMDL (ask Jenny Wu) to see an example where the TMDL was written in terms of DO deficit
- **Ex. 5 Deliberative Process (DP)**
- Does state have any translators/ratios between fecal coliform and enterococci?
 - We don't have data for enterococci
 - Fecal to e. coli is well established at 0.6 – may be able to pull data from nearby waters and do a regression
